Symptom (public)

Where is the START manual?

Problem (public)

Solution (public)

Up to now we preferred to put all the instructions directly on the web pages, because many people prefer to have some instructions on the page itself than to have a separate paper.

We also are collecting all the Q&A we receive in the FAQ... if you want to access them just create a login at the link <http://start.softconf.com/otrs/customer.pl> . You will be able to review all the questions you made us with the answers. Once done, send me an e-mail, and I will enable for you the FAQs.
