Symptom (public)

If someone with an account on the submission website submits a paper on behalf of an author, is there a way of ensuring that the author, instead of the submitter, receives the e-mails which are sent out via the website?

Problem (public)

Solution (public)

Sure. In the contact section, just enter the author's email address in the place slot for email. That will make sure that the email for the submission goes to the author.
